About This Study

The Arts & Economic Prosperity IV study was conducted by Americans for the Arts to document the economic impact of the nonprofit arts and culture industry in 182 communities and regions (139 cities and counties, 31 multi-city or multi-county regions, and ten states, and two individual arts districts)—representing all 50 U.S. states and the District of Columbia. The diverse communities range in population (1,600 to more than 3 million) and type (rural to urban). The project economists, from the Georgia Institute of Technology, customized input-output analysis models for each participating study region to provide specific and reliable economic impact data about their nonprofit arts and culture industry—specifically (1) full-time equivalent jobs, (2) household income, and (3) local and (4) state government revenue.

Surveys of Nonprofit Arts and Culture ORGANIZATIONS

Each of the 182 study regions attempted to identify its comprehensive universe of nonprofit arts and culture organizations using the Urban Institute’s National Taxonomy of Exempt Entities (NTEE) coding system, a definitive classification system for nonprofit organizations recognized as tax exempt by the Internal Revenue Code. In addition, the study partners were encouraged to include other types of eligible organizations if they play a substantial role in the cultural life of the community or if their primary purpose is to promote participation in, appreciation for, and understanding of the visual, performing, folk, and media arts. These include government-owned or government-operated cultural facilities and institutions, municipal arts agencies and councils, private community arts organizations, unincorporated arts groups, living collections (such as zoos, aquariums, and botanical gardens), university presenters, and arts programs that are embedded under the umbrella of a non-arts organization or facility (such as a community center or church). In short, if it displays the characteristics of a nonprofit arts and culture organization, it is included.

For-profit businesses (e.g., Broadway and motion picture theaters) and individual artists were excluded from this study.

Nationally, detailed information was collected from 9,721 eligible organizations about their fiscal year 2010 expenditures in more than 40 expenditure categories (e.g., labor, local and non-local artists, operations, materials, facilities, and asset acquisition), as well as about their event attendance. Response rates for the 182 communities averaged 43.2 percent and ranged from 5.3 percent to 100 percent. It is important to note that each study region’s results are based solely on the actual survey data collected. No estimates have been made to account for non-respondents. Therefore, the less-than-100 percent response rates suggest an understatement of the economic impact findings in most of the individual study regions.

In the Iowa Cultural Corridor, 62 of the approximately 166 eligible nonprofit arts and culture organizations identified by the Iowa Cultural Corridor Alliance participated in this study—an overall participation rate of 38 percent. The organizations that participated are listed below:

- African American Museum of Iowa;
- Arts Iowa City [AIC];
- Brucemore;
- Carl and Mary Koehler History Center;
- Cedar Rapids Area CVB;
- Cedar Rapids Choral Association;
- Cedar Rapids Downtown District;
- Cedar Rapids Freedom Festival;
- Cedar Rapids Museum of Art;
- Cedar Rapids Opera Theatre;
- Cedar Rapids Public Library;
- Chamber Singers of Iowa City;
- City Circle Acting Company;
- Coralville Parks & Recreation Department;
- Coralville Public Library;
- CSPS/Legion Arts;
- Diversity Focus;
- Dreamwell Theatre Company;
- Eastern Iowa Arts Academy;
- Englert Theatre;
- Eulenspiegel Puppet Theatre Co.;
- Hancher-The University of Iowa;
- Harmony Hawks Barbershop Chorus;
- Herbert Hoover National Historic Site;
- Impact CR;
- Inter. Academy of Russian Music;
- Iowa Central Community College;
- Iowa City Community Band;
- Iowa City Community String Orchestra;
- Iowa City Public Library;
- Iowa City UNESCO City of Literature;
- Iowa City/Coralville Area Convention & Visitors Bureau;
- Iowa Cultural Corridor Alliance;
- Iowa Masonic Library and Museums;
- Iowa Theatre Artists Company;
- Kalona Public Library;
- KCCK-FM Jazz 88.3;
- Landlocked Film Festival;
- Marion Arts Council;
- Marion Cultural and Entertainment District;
- Metro Mix Chorus;
- Mount Mercy University;
- Mount Vernon-Lisbon Community Development Group;
- National Czech & Slovak Museum & Library;
- Old Creamery Theatre;
- Orchestra Iowa/Cedar Rapids Symphony Orchestra;
- Pentacrest Museums;
- Poetic Rebound Performance Company;
- Red Cedar Chamber Music;
- Riverside Theatre;
- SPT Theatre Company;
- Summer of the Arts;
- The Ceramics Center/Iowa Art Works, Inc.;
- The Iowa Children's Museum;
- Theatre Cedar Rapids;
- UI Athletics Hall of Fame;
- University of Iowa Division of Performing Arts;
- University of Iowa Museum of Art;
- Ushers Ferry Historic Village;
- Washington Concert Association;
- West Liberty Area Arts Council; and
- Wickiup Hill Outdoor Learning Center.

Surveys of Nonprofit Arts and Culture AUDIENCES

Audience-intercept surveying, a common and accepted research method, was conducted in all 182 of the study regions to measure event-related spending by nonprofit arts and culture audiences. Patrons were asked to complete a short survey while attending an event. Nationally, a total of 151,802 valid and usable attendees completed the survey for an average of 834 surveys per study region. The randomly selected respondents provided itemized expenditure data on attendance-related activities such as meals, souvenirs, transportation, and lodging. Data were collected throughout 2011 (to guard against seasonal spikes or drop-offs in attendance) as well as at a broad range of both paid and free events (a night at the opera will typically yield more spending than a weekend children’s theater production or a free community music festival, for example). The survey respondents provided information about the entire party with whom they were attending the event. With an overall average travel party size of 2.69 people, these data actually represent the spending patterns of more than 408,000 attendees, significantly increasing the reliability of the data.

In the Iowa Cultural Corridor, a total of 940 valid and usable audience-intercept surveys were collected from attendees to nonprofit arts and culture performances, events, and exhibitions during 2011.

Studying Economic Impact Using Input-Output Analysis

To derive the most reliable economic impact data, input-output analysis is used to measure the impact of expenditures by nonprofit arts and culture organizations and their audiences. This is a highly regarded type of economic analysis that has been the basis for two Nobel Prizes. The models are systems of mathematical equations that combine statistical methods and economic theory in an area of study called econometrics. They trace how many times a dollar is re-spent within the local economy before it leaks out, and it quantifies the economic impact of each round of spending. This form of economic analysis is well suited for this study because it can be customized specifically to each study region. To complete the analysis for the Iowa Cultural Corridor, project economists customized an input-output model based on the local dollar flow between 533 finely detailed industries within the economy of Benton, Buchanan, Cedar, Delaware, Iowa, Johnson, Jones, Linn, Louisa, Muscatine, and Washington Counties. This was accomplished by using detailed data on employment, incomes, and government revenues provided by the U.S. Department of Commerce (County Business Patterns, the Regional Economic Information System, and the Survey of State and Local Finance), local tax data (sales taxes, property taxes, and miscellaneous local option taxes), as well as the survey data from the responding nonprofit arts and culture organizations and their audiences.
